Notes

This document is intended to be used as a reference guide to supply useful information for a design or installation. It is not intended to be a step-by step procedure for installation.

Any ceilings or walls must be strong enough to support the monitor and the installation must be in accordance with any local building codes. All mounts should make secure contact to wood studs.

4:3 sources can be displayed on the 16:9 screen in either normal aspect ratio with bars on the left or right, or stretched horizontally to fill the screen using the menus (see “Aspect Modes” in menus and user manual).

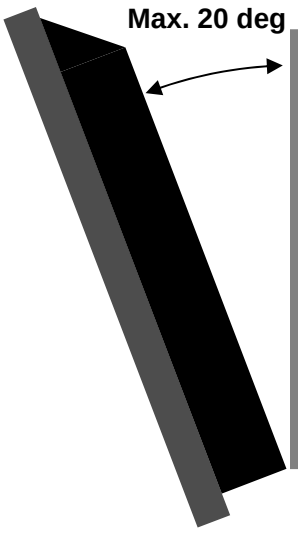
Distances are in inches, for millimeters multiply by 25.4.

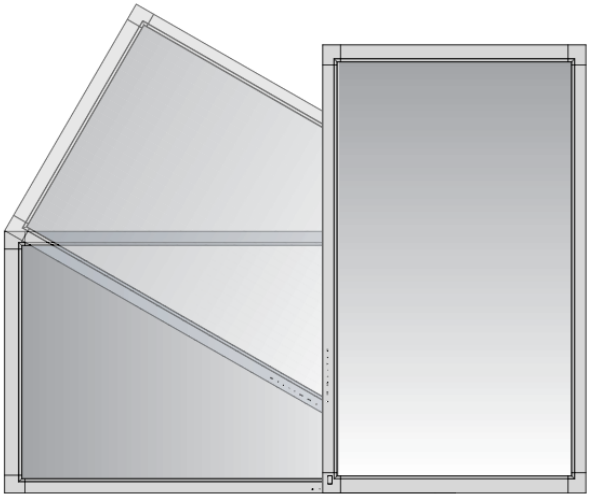
Distances may vary ±5%.

Tilt Angle and Rotation

Below are the maximum angles that the monitor can be tilted in the landscape position only.

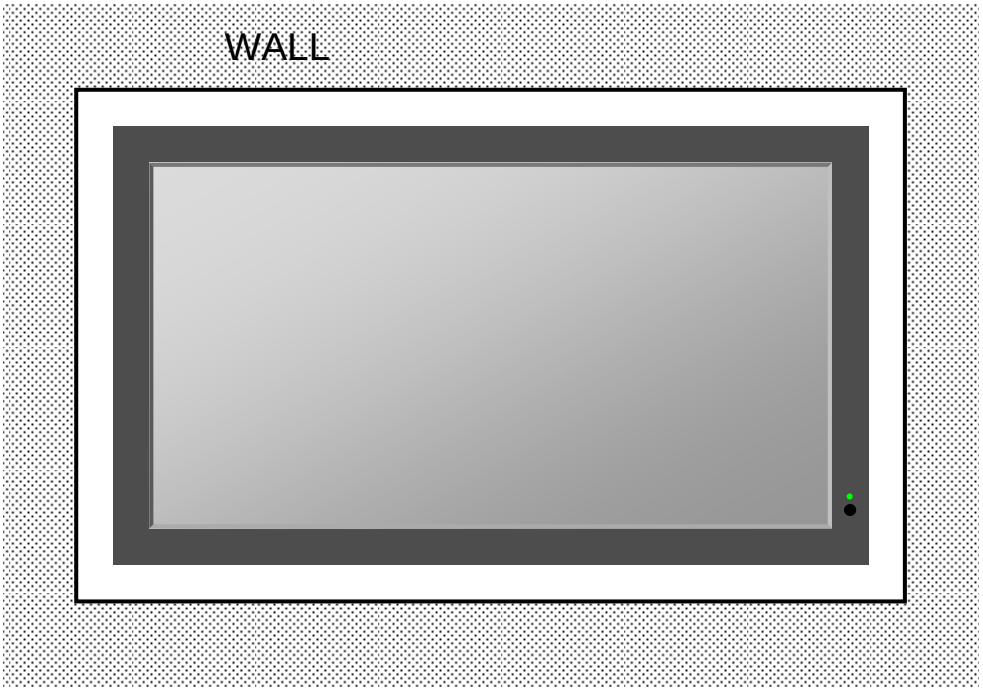
Landscape 20deg

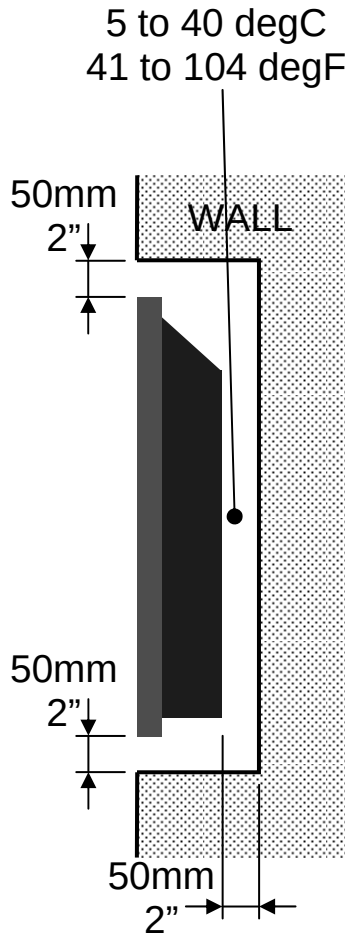




Ventilation Requirements (all models)

Dimensions below are minimum required for proper ventilation.





NOTE: *The ventilation space should not be covered or closed off at the front of the opening. If for some reason the opening needs to be covered, other means of ventilation will need to be incorporated into the design. Contact NEC for design review and recommendations.*
